Category:1981 births Category:Living people Category:Japanese female singers Category:Musicians from Tokyo Category:People from Chiba PrefectureQ: How to open a TextView inside another view in android I have a newbie question. I have a Layout, and I am using nested LinearLayouts. I want to include a textview inside one of the linear layouts. When I try this TextView tv = (TextView) findViewById(R.id.tv); tv.setText(arg1); I get an error. The error I get is "The following classes could not be found: - TextView" I do not have a class called textview. Can anyone tell me how I can do this? Thanks A: This is because when you use xmlns:android="" it also imports the android.* namespace. And this happens, so you are just using TextView inside another TextView and Android thinks you are not using that "android" class... You must use the xmlns to refer that textview and not the android one: TextView tv = (TextView) findViewById(R.id.tv); tv.setText(arg1); Stochastic denoising of a time series of monthly mean fire weather indices. Classical (linear) methods for inverse analysis of fire weather data are not suited for estimating accurate anomalies of a time series. A linear time series model based on the concept of the time-varying ARIMA structure is proposed for the problem of
