Field of the Invention This invention relates to a roller material for transfer of images and characters which have been transferred from one surface to another, and more particularly to a roller material which is employed for a thermal transfer printer, an electrostatic recording apparatus or the like, and which is provided with an image transferred surface having a gloss in which images and characters are transferred. 2. Description of the Related Art There has heretofore been known a thermal transfer printer in which the following steps are carried out. That is, a thermal head is heated and the heat thus generated is transferred to a recording paper through a heat-fusible ink layer, the ink is softened by the heat and this softened ink layer is transferred onto the recording paper by pressing the recording paper between the thermal head and a platen roller. The conventional thermal transfer printer described above is also known to have various problems, such as that the ink layer is stuck onto the platen roller because of the heat applied when printing.About A trend in 2018, the use of online business platforms has increased the level of competition in the arena.

Methoxybenzylidene-functionalized tridentate calix[4]arenes were synthesized and their non-covalent host properties for β -amino acids were examined. The molecular recognition characteristics of these calixarenes were investigated by means of isothermal titration calorimetry (ITC), UV-vis spectroscopy, and nuclear magnetic resonance (NMR) titration experiments. It was found that the β -amino acid enantiomer could be discriminated from the corresponding α -amino acid enantiomer in solution with a satisfactory sensitivity.. "All right, can we have a little love for the She-Hulk?" "Or a little hate?" "We'll do both." "Oh, she just took that out of the top drawer." "Huh." "My office." "What, you gonna fire me?" "If you're smart, Mr. Ross, you will, too." "Oh, that's the talk of the town." "I got to go." "You're bleeding." "What'd you do?" "Take something for it?" "Yeah, I guess I did." "A good day, Ms. Danvers." "So what do you think?" "I think if it were done right, it'd be great." "Something like this could really help my fashion line." "And something like this could really help your case." "I don't even know how this happened 2d92ce491b
