What is new in this version: - Sound has been added - Pitch control added - Some bug fixes System Requirements: - Windows Vista, 7, 8 or 10. - Intel Pentium 4 or Core i7 dual core 2.4 GHz processor, - 2 GB RAM Well, if you don't like the built-in Windows Media Player, then you should definitely try the new v9.125 Firma Player. It's a web-based application that lets you use WMP and even YouTube directly on the internet. First of all, you need to install the software. After that, all you need to do is to enter in your browser, and install the Firma Player. It's completely free to use. The interface is very simple to use. You can just visit the main page and begin the playback. But you have to understand that it won't allow you to download files from the Internet, so you'll need to be very careful when you're browsing. The program has very nice features. In the genre section, you can find lots of genres of videos, including the newest music videos. You can even choose the one that you like. The menu contains some features that will interest you, including playlists,

bookmarks, movies, and web pages. You can even choose to have a download button instead of the movie player. Well, that's all I can tell you about Firma Player. The download and installation are very easy, but it lacks some features that we would expect from a streaming video player. That's why it's not my first choice. Firma Player Online After you've installed the software, you
