Sound Cloud Link Grabber is a lightweight and easy to use application whose main function is to provide you with the download link for your favorite Sound Cloud song. The utility is rather basic and unimpressive in what concerns its interface, but it is quite practical, as it only features a simple window that enables you to quickly finish the job, without too much fuss. Sound Cloud Link Grabber requires that you enter the targeted song's URL address from your web browser, by accessing soundcloud.com and choosing the 'Share' option. There, you are provided with a string that you can copy and paste it into the program's 'Music Link' field, then press on the 'Grab Link' button. Almost instantly, the tool will display a lengthy URL in the 'Download Link' field, allowing you to copy it to clipboard, for further use. After copying the link, you can paste it in the web browser you prefer, or any other type of download application you generally work with, enabling you to save the audio to your computer, regularly to MP3 format, so you can listen to it whenever you want. Sound Cloud Link Grabber generally works for all situations, but you may run into difficulties in the case of certain paid songs. At the same time, the program simply provides you with the URL but it will not save the file for you, you have to do that manually, in a web browser. To conclude, Sound Cloud Link Grabber is a useful and efficient, though quite limited utility designed to help you obtain the download URL for the music listed on Sound Cloud, so you can save it to your PC and listen to it in any compatible media player or device.
